Harnessing the Power of AI and Critical Thinking for Better Decision Making

Critical thinking and decision excellence in an AI-enabled environment

Ideal for

You are a manager or business professional in an AI-driven environment, you aim to enhance your critical thinking for better decision-making. You seek to progress from basic AI tool usage to responsible integration, improving your ability to evaluate and apply AI recommendations effectively.

- Business Professionals
- Managers
- Senior Managers

Learn, Practice and Use

- Recognize how AI tools work and their limits enabling you to approach its outputs with curiosity and healthy skepticism
- Evaluate AI's recommendations critically by questioning, testing and validating the outputs before applying them
- Differentiate between human judgment and AI assistance and know when to rely on your own expertise, values and intuition
- Apply prompting strategies to guide AI toward more accurate, relevant and useful responses enabling better human decision making
- Identify personal or organizational opportunities to use AI effectively in your daily work to enhance and not replace your decision making
- Detect and mitigate bias or misinformation in AI outputs to ensure your decisions remain ethical and responsible

Highlights

- Get hands-on experience using popular AI tools such as generative prompts and bots
- Explore cross-functional stakeholders' needs and demands as a result of AI's dynamic technology shift

Key Competences

- AI Business Acumen
- Strategic Decision Making
- AI Adoption Readiness
- Stakeholder Alignment
- Data-Informed Judgment
- Ethical AI Awareness
